

Patriotic Deco Mesh Wreath Recipe

This wreath cost me **\$47.25** to make (see retail price calculation sheet below on page 5)

My selling price is \$174.87

(Even though calculation sheet says to sell it for \$176.59, I wanted to keep it below \$175)

Patriotic Wreath Recipe Detailed Instructions

(You can see where I purchased supplies on the calculation sheet below on Page 5.)

Mesh

- 1. Using the instructions from the ebook, I measured 10" loops using the jute colored decomesh for both the inner and outer ring of a 24" work wreath form. Fluff all the loops.
- 2. Instead of a second color between the inner and outer rings, I used the same mesh by placing the mesh in the twist ties of the outer ring (detailed instructions for adding a third row of mesh is in the ebook). I did not measure, just eye balled it. I would estimate it was about 8". I want just enough to fill in and add fullness so as not to see the metal frame.

Ribbon

3. Cut nine 14" pieces of ribbon for each ribbon style. Dovetail the ends. Take two ribbon streams and pinch in the middle; twist this middle into the wreath form ties by untwisting the ties already holding the mesh and laying the ribbon in and twisting the ties back. I alternate the ribbon streamers around the wreath form. Video for adding ribbon streamers can be found here: http://southerncharmwreaths.com/blog/how-to-add-ribbon-streamers-to-deco-mesh-wreaths/

Sign

- 4. While the wreath is lying flat on a table, position the sign on the wreath so that it is centered both horizontally and vertically and over two sets of twist ties on each end of the sign. Note where the twist ties will touch the back of the sign. You can use a pencil to mark the back of the sign if needed. For this sign and this wreath, it was about 2" from the ends of the sign.
- 5. Because this sign was thin, I could not use screw eyes. Instead take two pipe cleaners and use a heavy duty stapler to staple the center of the pipe cleaners at the 2" mark (or where you marked with a pencil) on the back of the sign on both ends of the sign. Shoot a dollop of hot glue on top of each staple to ensure the staple won't pop out. Let the glue cool completely before proceeding.
- 6. Lay the sign back on top of the wreath and twist the pipe cleaners that are stapled to the sign around the wreath FRAME where the needle ties are. Don't go through the mesh but around the needle ties. Make sure the sign is level. Once the sign is secured, twist the extra pipe cleaner onto itself to form one piece of pipe cleaner. Wrap the excess pipe cleaner around the wreath frame. (Note, after the wreath is completed, hot

- glue a silk leaf from the geranium bush over the extra pipe cleaner on the back of the wreath to hid the mechanics)
- 7. Pull out any ribbon that may be stuck behind the sign.
- 8. Turn the wreath over on the table. (TIP I like to place a dish towel on the table where the sign will be so the table won't scratch the front of the sign). Locate where you secured the sign over the needle ties on the work wreath form, they should be hidden under the mesh loops. Hot glue these needle ties onto the back of the sign. Let the glue cool completely before proceeding.
- 9. Turn the wreath back over and fluff any ribbon that was smashed.

Hanger

- 10. **TIP When attaching signs to wreaths, I attach the hanger after the sign is attached.**So that I know the sign will hang exactly like I want it too. I prefer at an angle since hanging it exactly horizontal and level is more difficult.
- 11. Attach a pipe cleaner as a hanger to the top of the wreath and hang it on an easel.

Flowers

- 12. TIP I like to place the flowers completely in my wreath before hot gluing so that I get the placement just right. Once they are placed the way I like them, I step back to view it at a distance to see if the colors are symmetrical.
- 13. Position three light blue hydrangeas in a triangle shape across the wreath from each other and hot glue onto twist ties (as described in ebook). In case you forgot, I like to make a hole with one twist tie, place the hot glued stem of the flower through this hole, then wrap the second twist tie around the first and entire flower stem so that the stem is both hot glued and wired. TIP Have the flower head of the hydrangeas facing in different directions (down, out and straight on) like they grow in nature to make them look more real.
- 14. Divide the cherry blossom bush by cutting off five stems from the bush. Using wire cutters, cut off the bottom leaves from the stems. Hot glue and wire onto every other needle tie on the outer ring of the wreath form. Because these stems are long, bend the stems around the wreath counter clockwise so that they do not stick straight out. TIP When you bend the stems, it forces the eye to flow around the wreath and looks more natural.
- 15. Cut three flower stems from the geranium bush and hot glue and wire these into the needle ties as described in ebook in a triangle pattern between the hydrangeas.
- 16. Hot glue the last cherry blossom stem into the needle tie of the inner ring so that it flows over the top of the sign.

Back

17. Finish off the back of the wreath by cutting long stems short. Hot glue geranium leaves (or any leftover silk leaves you have on hand) over the areas where pipe cleaners are wrapped around the wreath frame. Hot glue more silk leaves over needle ties so that it flows with the other leaves covering the pipe cleaners. This way it looks more like decoration than used to cover up mechanics.

If you have any questions on this wreath recipe, please address it in the forum using this direct link (note the link will only work once you have logged into the forum since it is password protected). http://southerncharmwreaths.proboards.com/thread/493/patriotic-wreath-recipe
